

Challenge Pātai

USE YOUR
VOICE

Can you
help us speak
up for our
native frogs!

Make a music video

We have adapted the lyrics of a well-known kids song to share with NZ the key things our frogs need from us:

- Action on climate change
- A clean, green NZ (frog skin sucks in pollution)
- A predator and pest free NZ
- Protection from diseases, like amphibian chytrid fungus
- Protection for their habitats.

Lyrics

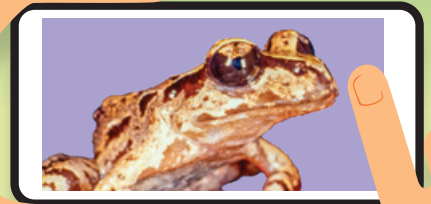

Three little native frogs

(Sung to the tune of five little speckled frogs)

Three little native frogs, sat on a forest log
Eating the most delicious bugs – yum yum!
One moved to a spot
That was clean, and not too hot
And that made for a happy, frog – gulp gulp

Two little native frogs, sat on a forest log
Eating the most delicious bugs – yum yum!
One moved now, carefree
Cause here's rat, weed, and fungus free!
And that made for a happy frog – gulp gulp

One little native frog, sat on a forest log
Eating the most delicious bugs – yum yum!
It moved knowing that
It would always have its habitat
And that made for a happy frog – gulp gulp

We want you to make an
awesome stop-motion music
video for this song!

Send us a link to your mahi, and
we'll share it on our website and
our social media!
kccinbox@forestandbird.org.nz.

Make your own
2D frog cut-outs,
or find ours on
kcc.org.nz
(search "frogs").
