

FOOD CHAIN FOUR

For **2**
players

You'll need:

- Two sets of game counters
- Playing board

Aim of the game:

To chain up four of your counters in a row while stopping your opponent from doing the same. The twist? In order to win, your counters must also be in the right order of the food chain!

How to play:

- 1 Each player chooses a set of coloured game counters.
- 2 Each player takes turns "dropping" their counters into the columns on the game board. To "drop" the counter, the counter slides downwards from the top to the last row or piles on top of the last counter put in that column.
- 3 Players work to get their counters in a straight line (horizontally or vertically) or diagonal line, with no gaps between them.
- 4 To win, the pictures on the counters must be in the following order

Kekeno

Wheke

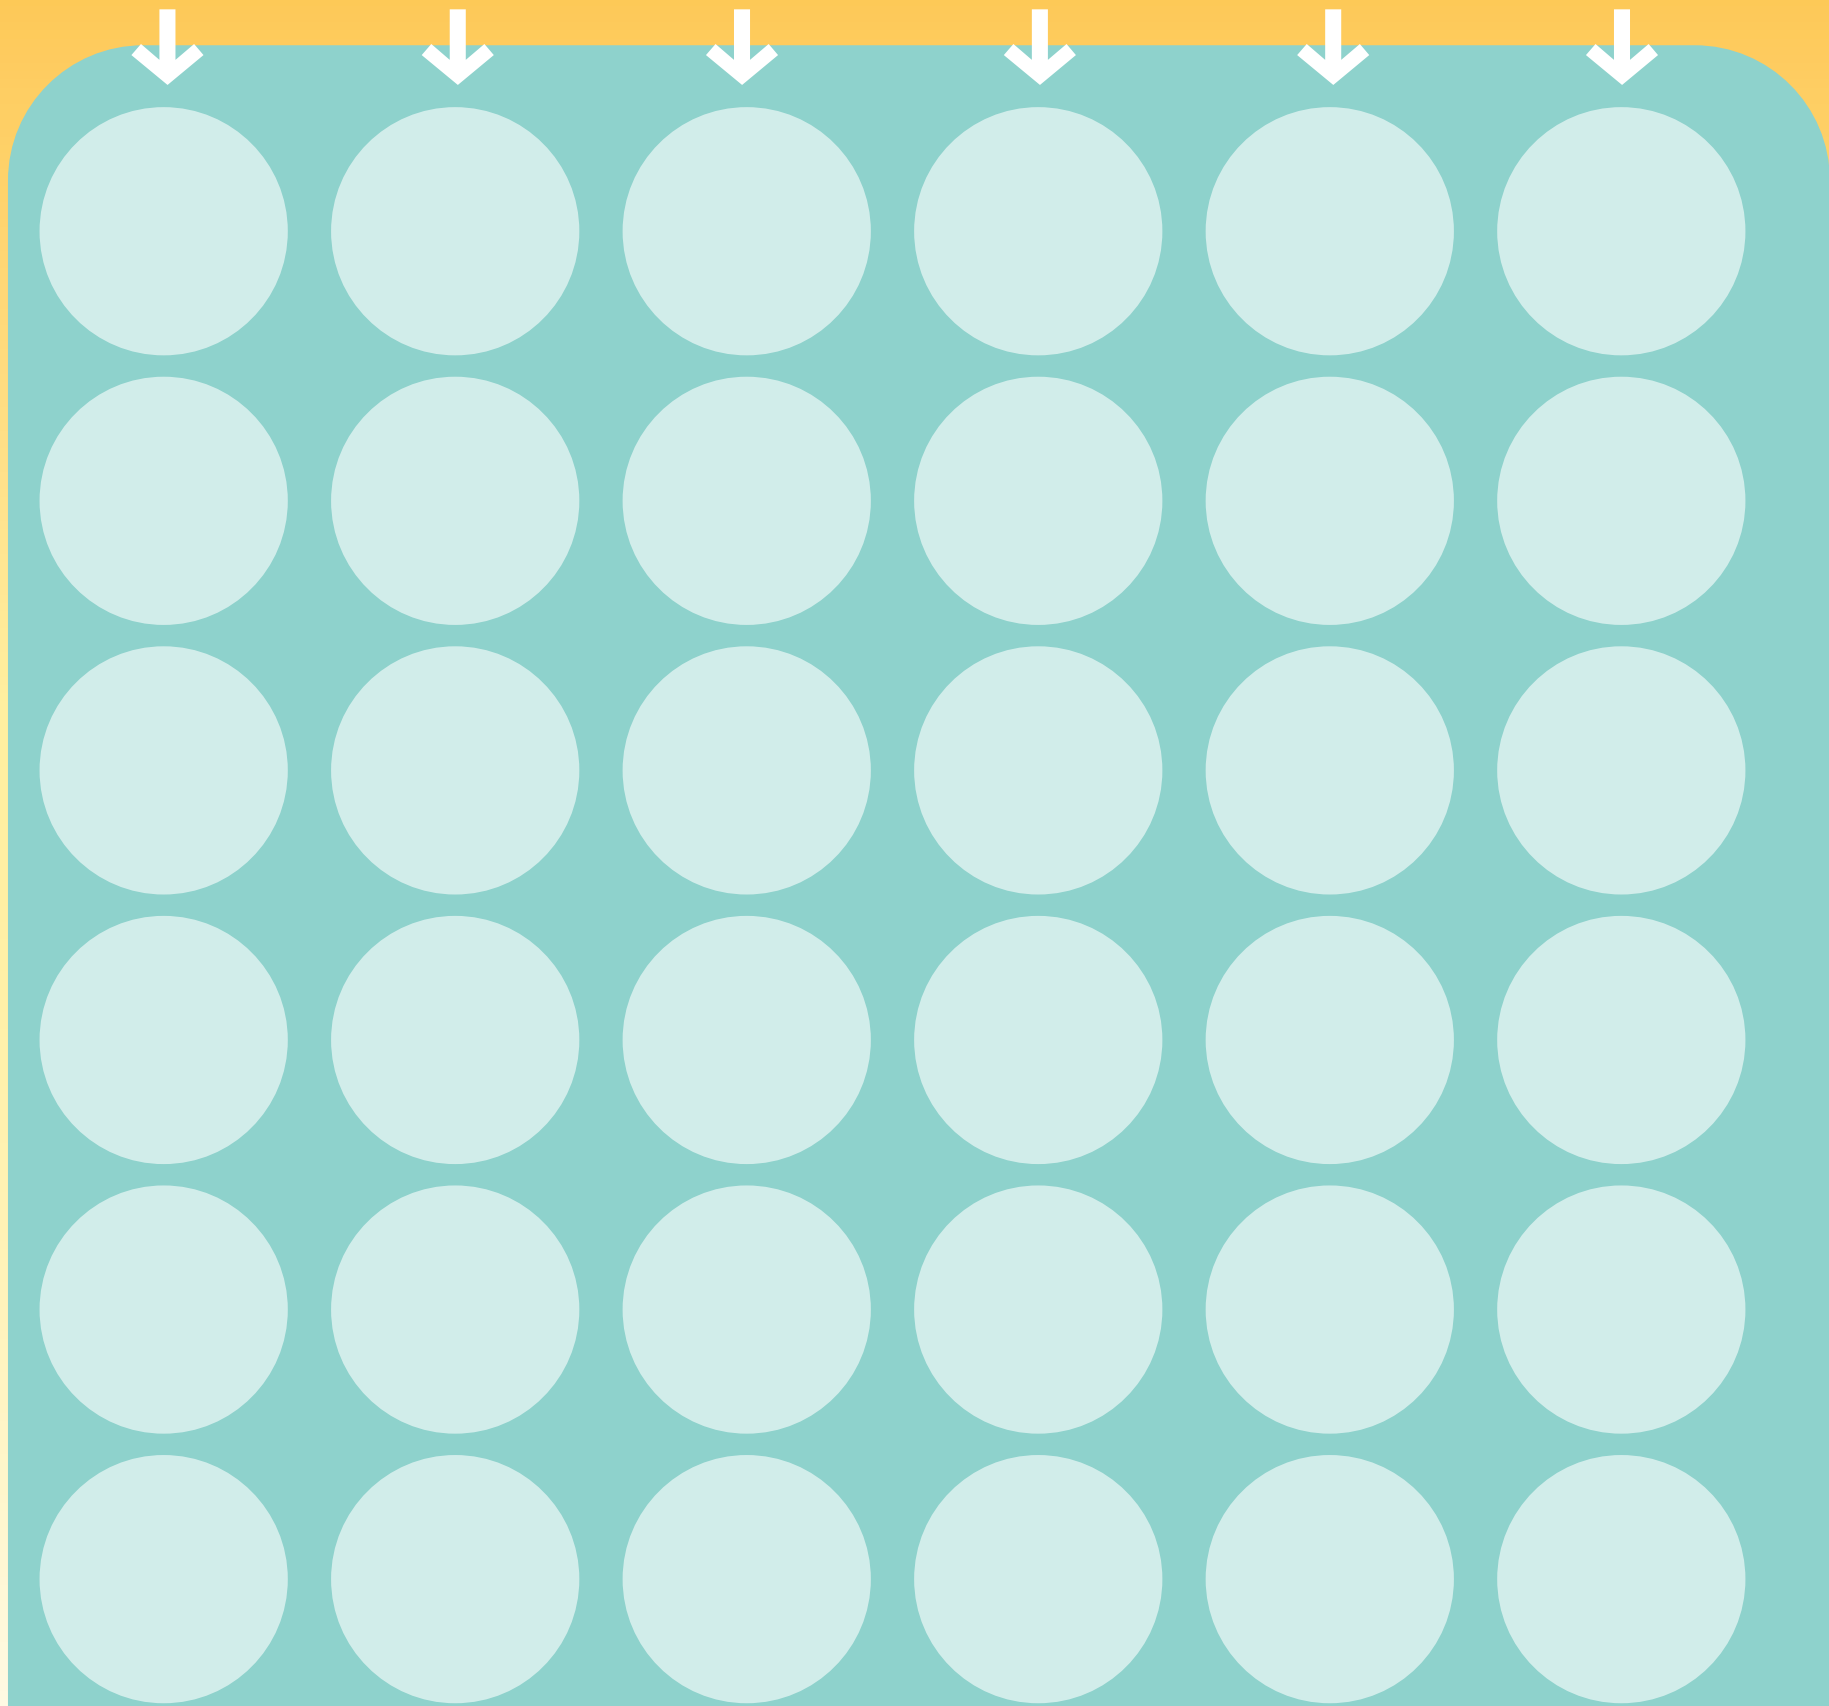

Pāpaka

Rimurimu

Make your own counters or download ours from kcc.org.nz. Search "food chain".
