

SPOT THE DIFFERENCE

Forest without pigs/deer/goats

Forest with pigs/deer/goats

How many differences can you find?

KCC
Kiwi Conservation Club - Hakuturi Toa

The more of us big browsing and scavenging mammals, the worse it is for a forest. I, for one, can eat almost anything (and will just vomit up the rest).

We keep eating until there is nothing much left. It's boom or bust!

Keep our numbers down as low as possible so the ngahere can fight climate change and be a healthy home to native species.
